

## Remote Backup

Business Expansion **TEAM**  
A Winning TEAM with a Winning THEME

Confidence, Pride, Integrity, Passion, Customer Loyalty

### Off-Site Data Safety

**Safety.** With data centers across the country; we have the location you need to make sure your data remains safe.

Cost effective options to optimize your satisfaction in Colocation

#### Options:

- Own or lease your hardware
- Server Hosting (Shared/Dedicated)
- Email Hosting (Pop3 and Exchange)
- Website Hosting
- ASP Hosting Services
- Total Failover Systems
- Remote Back-up

Colocation is the housing of your servers, leased or owned; within one of our data centers. Doing this allows you the peace-of-mind knowing that your data is safe from fire, hurricane, and other forms of natural or man-made disasters. With automated back-up and a no personnel needed to work with tapes, our remote colocation is the best option for any size company.

**Security.** Our systems are fully redundant, monitored 24x7 and most importantly can reduce your costs and improve the profitability of your organization. Our data center services can relieve you of the technical headaches of maintaining in-house systems.

\* Further Options information  
is on the backside.

**Office Location**  
**19905 Beverly Road**  
**Beverly Hill, MI 48025**      **1-877-379-8279**

**“Extreme Customer Service...No Exceptions,  
No Excuses!”**

**—Scott Lewis CEO**

Confidence, Pride, Integrity, Passion, Customer Loyalty

## Further Options Explanation:

**Server Options—Shared** is typically for business's looking for a less expensive solution; our shared server option allows you the Colocation you need, and the budget you can afford.

A **Dedicated** environment is a computing environment that is dedicated to only your business and your business applications.

**Email Hosting (Pop3 and Exchange)**—E-Communication without the bother up updating, managing and maintaining your internal email server.

**Web Hosting**—This too can be in a shared or dedicated environment. We will manage, monitor, and secure your web site to make sure it is running at peak performance

**ASP Hosting Service**—Application Service Provider. We can house the mission critical applications your company uses most. Keeping it in a safe and well maintained environment will ensure its uptime and productivity.

**Total Failover Systems**—House redundant servers within our data center and in the event of a server outage, you can switch to the servers we house for you and keep running with nothing more than a hick-up.

**Online Back-up**—Automated online backup solutions are the right choice for small, medium and large businesses that want to streamline their backup procedures while exceeding disaster recovery and business continuity standards.

**\*Individual information is available upon request**
